

Design to Shine!

CUPCHAIN EARRINGS

USED COMPONENTS

Cupchain with Chatons MAXIMA in crystal, 0018 and 29 in Silver cup

Cupchain with Chatons MAXIMA in crystal AB, 008.5 in Rhodium cup

EXPERT TIP #1

Choose four different sizes of cupchain and measure the length that will hang from each earring. Use wire cutters to make sure the cut is clean and does not damage the crystals.

Pro tip:
Our longest piece is 18 cm.

EXPERT TIP #2

Apply a small amount of jewelry glue to the top side of each cupchain and carefully press them together. Wipe off any excess glue immediately with a soft cloth to prevent residue.

EXPERT TIP #3

Apply glue to the flat surface of the earring stud and carefully press it onto the back of cupchains, aligning it centrally to ensure the earrings hang evenly. Hold the stud in place for a few seconds to ensure a secure bond.

Pro tip:
Allow the glue to dry completely, we recommend at least 24 hours.
